CELLUMA PRO LED 40 30 min

Light Emitting Diode (LED) phototherapy is the application of light energy to tissue to obtain therapeutic benefits. The energy is used to improve cellular performance. Phototherapy is known for its healing and anti-inflammatory properties and have a variety of applications across many medical fields. Research has shown that phototherapy can: increase circulation, accelerate tissue repair, kill acne bacteria, decrease inflammation, improve skin tone, texture and clarity, reduce muscle and joint pain, stiffness, spasm and arthritis.

This is a great add on to any treatment Packages available*
